

Archipelago Bat Guano: Natural Organic Phosphate Fertilizer (0-7-0)

Sustainably mined from caves in Indonesia, fossilized bat guano has a long and successful history as a natural source of phosphate, calcium and iron.

PREMIUM PRODUCT

The owners and operators of Archipelago Bat Guano, LLC (ABG) and their Indonesian sister company have worked diligently to apply contemporary scientific methods, sustainable mining practices and socially responsible business management to the collection, importation and distribution of fossilized bat guano.

Growers, gardeners and farmers can count on a consistent chemical analysis when using ABG's 0-7-0, which contains 17% calcium, 3% iron and other micronutrients. After removal from collapsed caves, the guano is then ground to a consistently-sized fine grained powder. Otherwise, it is wholly untreated. The consistent grain size of the guano allows for even application as a dry fertilizer.

ENVIRONMENTALLY FRIENDLY

Prior to the petrochemical fertilizer revolution of the early 20th century, guano was considered by many agricultural nations to be essential to their economy. Not because it was organic, but because it produced spectacular results. Fresh guano was used for its high nitrogen content, while fossilized guano, similar to ABG's 0-7-0, provided necessary phosphate and micronutrients.

ABG 0-7-0 is OMRI listed. Required tests show that ABG 0-7-0 contains no potentially harmful bacteria.

EASY TO APPLY

Guano can be applied by incorporating into soil, compost or potting mixes. It can be brewed to a tea or mixed with water to make a foliar spray, which can be applied directly to the soil under drip lines (some precipitants remain in solution).

FLEXIBLE PACKAGING AND PERSONALIZED SERVICE

Archipelago Bat Guano Natural Organic Phosphate Fertilizer, 0-7-0 is packaged in 25 kg bags (55 lbs.) and palletized. The package is appropriate for retail sale. ABG's 0-7-0 is warehoused in Stockton, CA. Full container quantities are offered delivered with customs clearance. Call our experienced and friendly sales staff for more details.

Archipelago Bat Guano: Natural Organic Phosphate Fertilizer (0-7-0)

BENEFITS:

- Contains 7% Phosphate, 17% Calcium and 3% Iron
- Derived from fossilized bat guano
- Promotes root growth, abundant blooms and increased fruiting
- Vegan alternative to bone meal
- Can be applied dry or in liquid form
- Acceptable for use in organic growing

OTHER PRODUCTS:

- PAR4® 1-0-2 Kelp Meal
- PAR4® 2-14-0 Granulated Bone Meal
- PAR4® 9-3-7 Granulated Multi-Purpose Fertilizer
- PAR4® Greensand
- PAR4® Protein Meals
- Azomite Trace Mineral™ Product
- Calphos™ Soft Rock Phosphate
- RO Dried Bat Guano 7-3-1
- Agricultural Gypsum

ABG's 0-7-0 Guaranteed Analysis

| | |
|---------------------------|------|
| Total Nitrogen (N) | 0% |
| Available Phosphorous (P) | 7% |
| Potash (K) | 0% |
| Calcium (Ca) | 17% |
| Iron (Fe) | 3% |
| Manganese (Mn) | 0.5% |

Suggested Application Rates

| | |
|------------------------------|--|
| Gardens, Farms and Vineyards | 3-4 lbs per 100 sq.ft. per year |
| Containerized Plants | 1 tbsp per 4 gallons of soil (applied every six weeks) |

For best results, follow a complete fertility program that includes regular soil testing. To learn more about products and services, please visit our website at www.BridgewellAgriculture.com
